Hi Jason,

That is a common issue. On the top-right corner of your data source page, change the connection type to "extract" will fix the issue.

3	time_series_3.csv	1	24
4	time_series_4.csv	1	24
5	time_series_5.csv	1	24
6	time_series_6.csv	1	24
7	time_series_7.csv	1	24
8	time_series_8.csv	1	24
9	time_series_9.csv	1	24
10	time_series_10.csv	1	24

Check it here for the explanation: <https://www.thedataschool.co.uk/timea-demeter/an-error-occurred-while-attempting-to-save-the-workbook-why-am-i-getting-this-message-and-how-to-fix-it>

Cheers,

Kane

Hi,

I am also having similar issue but in my page, at the top right corner there is no option for the connection type options. What should I do? Is there a server that I should connect to or do something else? Thank you.

This is what it shows on my page. As you could see, there is no connection type options on the top right?

Hi Amarnath,

Can you go to the consultation tomorrow? Jeffery will help you troubleshoot that issue.
