Academic Integrity for Submissions #135

Hi teaching staff,

I personally have a habit of saving the tableau visualisation I created. As far as I know, visualisation created with tableau is open to the public. Is that violating academic integrity? Or will I get in trouble when doing plagiarism check for my submission?

Thanks,

Jie

Hi Jie,

Good question.

First, you should not post anything related to the homework or tests in this unit to the Tableau public. You can and you should post your assignment 1 project, as that's your work.

Second, you should include references if you are posting things to the Tableau public (at the bottom of the dashboard or the charts), incl. where the data comes from, where some charts come from.

You can use Tableau Desktop if you want to save the workbook locally:

Hi,

What would I have to do if I've already saved some of this unit's work onto Tableau Public?

Thank you!

Kane Li STAFF 6mth

Hi Kang,

You should delete them asap.

Cheers,

Kane

Hi teaching team,

Homework 5 involves publishing our finalised Dashboard, in the submission requirement, a publicly accessible Dashboard URL is needed. will this be violating academic integrity? As you said anything related to homework must not be posted as well.

Attached below is a screenshot from the Homework 5 specs:

2. Submission

A report must be submitted in PDF format through the submission link on Week 5 page. The page limit of the report content (Part 1 and Part 2) is 2 pages. Part 1 and 2 are each worth 0.5%. Write a report that contains the following information:

- Your identity (name, Monash student ID, lab, tutor name)
- A screenshot of part 1 and part 2
- A URL of publicly accessible Dashboard (refer to Week 1 Tableau Document - Section 3.4 for publishing a dashboard).

↩ Replying to Chantelle Loh

Hi Chantelle,

Sorry about that part. That is totally fine. The purpose of this homework is to help you prepare for your Assignment 1 publishing.

Cheers,

Kane
