Hi teaching team, if I were to refer to certain concepts in the slides from Moodle, eg, maybe the mention of Gestalt Principle, would I have to cite it? Does this unit permit the citing of Lecture Notes? Screenshot taken from https://guides.lib.monash.edu/ld.php?content_id=12586146

University course materials

Note: Not all lecturers approve the citation of unit materials, such as lecture slides, in assignments. Check with your lecturer first to see if these resources are acceptable

| Lecture notes on Moodle | Author, A. A. (publication date). <i>Title of lecture</i> [Lecture notes]. Retrieved from 'website address' |
|--------------------------------|--|
| | Cioe, J. (2012). <i>The normal distribution</i> [Lecture notes]. Retrieved from http://moodle.vle.monash.edu.au Note: These are treated like books if they are published, but like personal communication if they are your own notes or unpublished. Lecture notes are considered published if they have been copied and distributed in print or on the web with the instructor's permission. |
| Custom textbook or unit reader | If the custom text book or unit reader contains previously published articles or chapters, cite them as if you found them in the original source. |

Hi Lap,

It will depend on the content.

If you are just analysing your own graph with the gestalt principles - you do not have to give references in the report (can just consider the principles as general knowledge).

If you need to cite the gestalt principles, then perhaps citing the original paper is better than citing the lecture note.

If there is some information provided specifically in the lecture or lecture slides, feel free to cite the lecture notes.

Cheers,

Kane
