VIEWS

" Authorship: Because your visualisation is publicly accessible, you should indicate your authorship and the license under which you make your work accessible."

This is the original sentence in the data visualization. I want to know what is that mean? What I need to do?

Hi Xiaokun,

Basically, you should include your name (or your Tableau username) on the Tableau website for assignment 1. I do not think you need to do any additional steps for the Tableau username, cause Tableau will display your name there.

If you want to include some other words for limiting other people to use your work, you can add a copyright/authorship statement at the bottom of the Tableau dashboard - but that is up to yourself whether you want to include that.

Cheers,

Kane

So we don't have to do anything for Authorship such as reserving a space in the dashboard for our names because Tableau does it automatically?
