Hi there, just wanted some clarification on this, for this assignment are we recommended to use more simpler charts (meaning the charts that are already available in vega-lite) and thus making it acceptable to use multiple common charts such as bar charts and area chart?

Hi Nathan,

The rubrics for Assignment 2 is the same as Assignment 1. If a more complicated visualisation is appropriate and more informative, then you should try that, instead of only using a simple chart.

Vega-lite does support a lot of complex visualisations as well. It is hard to argue whether there are more visualisations that you can implement with Tableau or Vega-lite. However, if there is any visualisation that you want to use for your assignment 2, but the visualisation is not available on Vega-lite, feel free to talk to your tutor and try some other tools.

Cheers,

Kane
